Barcelona, 20 April 2017. – This morning, **Jordi Cornet**, special representative of the State at El Consorci de la Zona Franca and President of eDelivery, and **Blanca Sorigué**, CEO of eDelivery Barcelona, have presented a new trade fair that focuses on logistics and delivery, two key aspects in the success of any digital business. **eDelivery Barcelona Expo & Congress** is to be held from 6 to 8 June in Hall 8 of the Montjuïc - plaça Espanya Fira de Barcelona venue, coinciding with the 19th edition of the **International Logistics and Material Handling Exhibition (SIL 2017)**.

In the press conference presentation, **Jordi Cornet** said that **“eCommerce in Spain has emerged strongly in the last two years and logistics and delivery have become the**

two fundamental keys for the success of any business of this nature. In our country, there is no event dedicated to eCommerce that put all the focus on logistics and delivery and, therefore, we believe it is essential to fulfil this need by creating the eDelivery Barcelona Expo & Congress". Mr Cornet added that "this fair was created to satisfy a consumer demand, to help you buy at the best market prices, receive purchases in the shortest possible time and wherever you like".

The special representative of the State at El Consorci de la Zona Franca and President of eDelivery Barcelona also added that *"the creation of eDelivery Barcelona Expo & Congress is a reflection of the vision that we, at El Consorci de la Zona Franca de Barcelona, had over the past four years to join forces by multiplying results".*

In 2016, eCommerce in Spain reached a turnover of € 24,000 million. This amounts to a 15 % increase compared to last year, when it reached over € 20,000 million, 26 % more than in 2014, according to the National Commission for Markets and Competition.

However, in 72.1 % of cases, **breaches of delivery terms** are the main problem for eCommerce users, according to the Observatory of eCommerce Habits developed by Trusted Shops and Alpha Research. The second most important issue for users is the **delivery of wrong orders** in 29.3 % of cases. For this reason, today it is impossible to succeed in eCommerce without good logistics and delivery, as customer satisfaction depends on these two factors.
